

VHE Gamma Ray Observations of Southern Hemisphere AGNs

P.M.Chadwick, K.Lyons, T.J.L.McComb, K.J.Orford, J.L.Osborne, S.M.Rayner, S.E.Shaw,
K.E.Turver (University of Durham)

A range of AGNs visible from the Southern hemisphere has been observed with the University of Durham Mark 6 very high energy gamma ray telescope. Results of the observations of PKS 2155–304, 1ES 0323+022, PKS 0829+046, 1ES 1101–232, Cen A, PKS 1514–24, RXJ 10578–275, 1ES 2316–423, PKS 2005–489 and PKS 0548–322 are presented.
